ADIL SARSEMBEK

Monitoring and support of government information systems: I analyse event logs, diagnose incidents and coordinate their resolution through to completion.

TARGET ROLES

Information Security Specialist /
Monitoring Engineer

Infrastructure monitoring, incident coordination, diagnostics and automation.

+7 708 551 3925 · adil04@Inbox.ru · Telegram: @adil10961

Astana, Kazakhstan · On-site work · Available for business travel

15-20 information systems · approx. 2,500 sensors

Within the department's scope of responsibility

WORK EXPERIENCE

November 2025 - present

Workforce Development Center JSC

Lead Expert Analyst

• Configure PRTG and add monitoring targets; refine Python/Bash scripts and SQL queries for information system monitoring.

• Diagnose integration services using logs and SQL data; coordinate incident resolution and verify the outcome.

• Coordinate access and collaboration with the responsible departments.

• Gather requirements, document processes, prepare technical specifications and development tasks; verify implementation.

• Develop and coordinate procedures, prepare reports and formal records, and handle official correspondence with government bodies.

March 2025 - November 2025

National Information Technologies JSC

Information Security Specialist (Incident Response Engineer)

• Logged and analysed incidents, identified responsible teams and followed up on resolution; worked with event logs.

• Monitored IT infrastructure, information systems, services and communication links; performed initial diagnostics and responded to failures.

• Analysed and coordinated change requests for information systems and services.

June - October 2024

KaR-Tel LLP (Beeline) · Technician

• Internet installation, cabling, routers, modems, set-top boxes and switches; advised customers on telecommunications services.

March 2023 · Gosgradkadastr RSE

Internship, Department of Digitalisation and Information Security.

SKILLS AND DEVELOPMENT

TECHNICAL SKILLS

Databases: Oracle, PostgreSQL

Integrations: SOAP / REST API (basic knowledge)

Splunk - practical experience: reviewing existing dashboards and alerts, searching and analysing events, writing SPL queries.

Zabbix - practical experience: reviewing existing dashboards, graphs and alerts; analysing alerts and diagnosing issues; configuring items, triggers and notifications.

Grafana - practical experience: reviewing dashboards and graphs; analysing metrics and diagnosing issues; creating and configuring dashboards, connecting data sources and setting up alert rules.

Cacti - practical experience: reviewing traffic and load graphs; analysing metrics and identifying issues; adding devices and configuring data collection; creating and configuring graphs and templates.

Python: refine scripts for monitoring and system availability checks, processing logs, files and data, and automating routine tasks and reports.

Bash: refine scripts for monitoring and service availability checks, working with files and logs, automating commands and routine Linux operations, and preparing monitoring data.

SQL: search and filter data (SELECT, WHERE), join tables and aggregate results (JOIN, GROUP BY), diagnose issues and validate incident-related data, write monitoring and reporting queries.

Linux: review logs and diagnose issues; manage services and processes; work with files, permissions and users; check network connections and service availability.

Windows Server: review event logs and diagnose issues; manage services and processes; work with users, groups and permissions; check network connections and service availability.

EDUCATION

Astana IT University · Cybersecurity · 2021-2024

Thesis: Development of a method for analysing techniques to counter a targeted phishing attack.

Developed an educational website covering phishing prevention basics. Implemented a URL input, phishing checks through an external service, and display of the result.

TRAINING AND CERTIFICATES

2026 · Cisco: Endpoint Security, Python Essentials 1 and 2, Introduction to Modern AI. OPSWAT: Introduction to Critical Infrastructure Protection. Stepik: Linux Terminal Basics; Docker for Beginners. Lerna/Skillbox: Prompt Engineering Basics. Astana Hub: AI Basics.

In progress: Blue Team Interactive Range

2023 · Cisco IT Essentials, CyberOps Associate, Computer Networks Security

2022 · Cisco Introduction to Cybersecurity, Cybersecurity Essentials

HACKATHON AND LANGUAGES

HackAlem AI · Participant · 23 September 2026 · Astana

International AI hackathon that set a Guinness World Record for the number of participants (2,415).

Languages: Kazakh (native), Russian (fluent), English (conversational).
